SPECIAL REPORT FROM OUR BUILDING CHAIRMAN.

The Building Committee in the past couple of weeks received the final draft of the building renovation plans from the Architect. The e-drawings were completed with the input from Structural, Mechanical, and Electrical engineers working with the Architect. The Committee is reviewing those plans to provide their input to the Architect.

Once the review is complete the building renovation plans will be printed and ready for application for building permit and seeking final Diocese approval for the project.

The next step following the approvals will be for the Architect to tender the project seeking interested contractors to complete the proposed renovations to the Church.

Thanks Paul for putting this together for us!!!!

NEWS FROM THE A.C.W.

As mentioned in previous newsletters, our A.C.W, have been making donations to the needy and various groups during this difficult time. Please keep in mind, we have no way of raising funds, no books sales, no loonie draw etc, so if you have some spare change that is heavy in your pocket, our A.C.W. Treasurer Ruth Steddel can help with that problem!!!!!!

FROM THE GROUNDS CREW

Please be careful while walking at the outdoor services, the ground is uneven, there are a few holes, pine cones and electrical cords. Take your time no rushing or **“running”!!!!!!**
